**DEPARTMENT OF BOTANY**

**BEST PRACTICES**

**CLEAN AND GREEN**

The “Clean and Green”, organized by the Botany Department at Govt. Degree college Jammalamadugu, aimed to promote environmental sustainability and enhance the college campus's green cover. The initiative brought together students, faculty, and staff to participate in a variety of activities, including tree plantation drives, campus clean-up efforts, and awareness workshops on the importance of plants and eco-friendly practices. Trees were planted across the campus, contributing to cleaner air and a more aesthetically pleasing environment. In addition, waste management initiatives were implemented, and participants learned about sustainable practices that can be incorporated into daily life. The campaign not only helped beautify the campus but also raised awareness about the crucial role plants play in maintaining a healthy and green environment. Through the collective efforts of the college community, the initiative successfully promoted a cleaner, greener, and more sustainable campus for everyone.
